REACH Business Impact Assessment

- ◆ *Will I be affected by REACH?*
- ◆ *What do I need to do to establish a REACH Compliance strategy?*
- ◆ *How much will it cost?*

Gillies Associates Limited is an approved service provider under the UK Chemical Industries Association REACHReady scheme (<http://www.reachready.co.uk>)

REACH is not just something that affects the chemical industry or companies which make chemical products. Most companies will be impacted in one way or another since most use chemicals – as paints, cleaning agents, glues, solvents, metal parts, etc. For some, REACH can become an important business continuity issue if a key raw material is no longer available on the market.

Every business needs to assess the likely impact of the REACH Regulation on its activities. But where do you start? Gillies Associates Limited can help you understand the implications by carrying out a **REACH Business Impact Assessment (BIA)**. A BIA helps you to define your supply chain role(s) – as defined in REACH – and how substances are used in your activities. It also checks for any exemptions that you can benefit from and delivers an Action Plan to chart you through the REACH maze.

REACH BIA – a one-day session to examine the implications of REACH and review business activities which identifies supply chain functions, possible exemptions and key issues for more detailed investigation. At the end of this you should have a better understanding of REACH and how it affects your business, know the key actions you need to take and the options available.
